Applicant:	Brett Webb et al	Examiner:	Jamisue A. Webb
Serial No.:	09/825,592	Group Art Unit:	3629
Filed:	April 3, 2001	Docket No.:	10003933-1
Title:	WEBSITE FOR HOUSEHOLD INVENTORY AND MAINTENANCE WITH REMINDER SYSTEM AND METHOD		

DECLARATION OF STEVEN E. DICKE AND PAUL S. GRUNZWEIG

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450
Dear Sir/Madam:

This Declaration is submitted in support of the Declaration of Prior Invention Under 37 C.F.R. 1.131 submitted to establish conception of the subject matter of the present patent application prior to the effective reference date of February 13, 2001 of Singer U.S. Patent Publication 2002/0111846 coupled with due diligence from prior to the effective reference date to the filing date of April 3, 2001 of the present patent application (i.e., constructive reduction to practice).

The persons making this Declaration are patent attorneys Steven E. Dicke and Paul S. Grunzweig of Dicke, Billig & Czaja. We state as follows:

On or after September 7, 2000, Steven E. Dicke received a Letter enclosing HP Invention Disclosure No. 10003933-1 from HP Patent Attorney-Outsourcing Manager Steven R. Ormiston (see Attachment 1, three pages). Upon receiving this invention disclosure, it was placed in a queue of other patent applications to be prepared on behalf of HP.

During the period between approximately September 2000 and April 2001, we had a reasonable backlog of unrelated cases on which we worked reasonably hard and carried out expeditiously. Our practice was to attend to the preparation of patent applications having bar dates first and attend to the preparation of the remaining patent applications (including the present patent application) generally in the chronological order in which they were received.

On September 28, 2000, Steven E. Dicke sent a letter to patent attorney Paul S. Grunzweig requesting that he prepare a patent application based on this disclosure referenced by our file number H302.156.101, as well as other disclosures (see Attachment 2).

Attachment 3 is a copy of billing invoice detailing activities of patent attorneys Paul S. Grunzweig and Steven E. Dicke for preparation of the present patent application for HP

Amendment and Response

Applicant: Brett Webb et al

Serial No.: 09/825,592

Filed: April 3, 2001

Docket No.: 10003933-1

Title: WEBSITE FOR HOUSEHOLD INVENTORY AND MAINTENANCE WITH REMINDER SYSTEM
AND METHOD

Invention Disclosure 10003933-1, covering a time period extending throughout January 2001. During January 2001, Paul S. Grunzweig reviewed the information from, and discussed the invention disclosure with, the inventor Brett Webb and drafted and prepared the present patent application.

Attachment 4 (1 page) includes an electronic mail communication dated January 31, 2001 from Paul S. Grunzweig to Steven E. Dicke regarding a draft patent application for file H302.156.101 (Home Maintenance Web Site).

Attachment 5 (2 pages) includes a facsimile cover page, with a fax confirmation report, dated February 13, 2001 from Steven E. Dicke to Steve Ormiston regarding drawings for a draft patent application regarding HP Invention Disclosure 10003933-1 (H302.156.101).

Attachment 6 (1 page) includes a Letter sent on March 6, 2001 by patent attorney Steven E. Dicke to Ms. Dianna Baker of Hewlett-Packard regarding patent application documents for filing a patent application based on HP Invention Disclosure 10003933-1 (H302.156.101).

As a person signing below, I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

Re: Preparation and Filing of Patent Application
Pursuant to Outside Counsel Procedures dated October 15, 1999
HP Invention Disclosure PD No. 10003933-1
Entitled: "Website That Would Allow Consumer To Enter A Household Inventory Of
Items That Require Maintenance, Repair And Replacement"
Inventor(s): Brett M. Webb, et al.
HP Required Receipt Date: February 24, 2001

Dear Steve:

We would like you to provide us with a quote of the cost for your firm to prepare a US patent application based on the HP invention disclosure identified above, a copy of which is enclosed. Your quote should be based on preparing and supplying us with the completed application, formal drawings, European claims and abstract, and a disk containing the electronic file for the application including European claims and abstract all to be received by the HP required receipt date stated above.

Your quote should be submitted on the enclosed Request for Quote And Engagement Letter Agreement. If your quote is accepted, we will return a fully executed copy of the Agreement to you for your records. **The Agreement will not be binding on you or on HP until signed by HP's authorized representative.**

If this Agreement is not signed and returned to HP, any bills submitted by you cannot be paid.

Thank you for your assistance in reviewing the invention disclosure. If your review indicates a possible conflict for your firm, you should advise us within one week of receipt of this letter.

Sincerely yours,

Yuonne Bailey for Steven R. Ormiston

Please submit this disclosure to the HP Legal Department as soon as possible. No patent protection is possible until a patent application is authorized, prepared and submitted to the Government.

Descriptive title of invention: Web site that would allow consumer to enter a household inventory of items that require maintenance, repair, & replacement

Name of project:

Product name or number:

The invention is described in my lab book # 4233 or in the following other records: _____

Has the invention been built or tested? No ☒ Yes ☐ Date built or tested: _____

Was a description of the invention published or are you planning to publish? No ☒ Yes ☐

Date and location of any actual or proposed publication of the invention: _____

Was a product including the invention shown, announced or sold? No ☒ Yes ☐ Date and location of any actual or proposed announcement, offer to sell or sale of the product: _____

Name and date of anyone outside HP to whom invention will be or has been disclosed: _____

If any will occur within three months, please call your IP attorney or the Legal Department at 1-857-2542 or 415-857-2542.

Government Contract: _____ Was this invention made under a government contract? No ☒ Yes ☐

Government agency and contract number: _____

Description of Invention: Please preserve all records of the invention and attach additional pages giving the following: Each additional page should be signed and dated by the inventor(s) and witness(es)

- Problems solved by the invention.
- Prior solutions and their disadvantages (if available attach copies of relevant technical articles or patents).
- Description of the construction and operation of the invention (include appropriate schematic, block and timing diagrams; drawings; samples; graphs; flowcharts; computer listings; etc.).
- Advantages of the invention over what has been done before.

Signature of Inventor(s): PLEASE SEE BACK OF FORM FOR ADDITIONAL REQUIRED INVENTOR INFORMATION.

I (we) this date 5/3/00 submit this invention disclosure pursuant to my(our) employment agreement.

www.homemaintain.com - Web site that would allow consumer to enter a household inventory of appliances, building material, or any other items that require maintenance, repair, and replacement.
Brett Webb & David Lanning LCS R&D Lab
May 3, 2000

Brief Description:

This web site would containing the following:

1. This web site would allow the consumer to enter an itemized list of household and house related information that will require maintenance, repair, and replacement. For example, all appliances (make, model), structure information (roof, siding), floor information (carpet (manufacture, grade), linoleum), paint (brand, type), lighting, etc.
2. With the above information, this database or inventory could be used to provide the consumer with a maintenance calendar. The consumer could print the calendar and use it to ensure regular maintenance. If the consumer would prefer, an email reminder could be sent as an alternate to the calendar, or both could be used.
 - a. The maintenance calendar/email would not only contain the helpful reminder; it would also contain a job ticket and an online shopping link. The job ticket would tell the user the part(s) needed, tools needed, time expected, and "how to" instructions and web links for further information. The online shopping link would link customers to URL's containing parts and prices from a variety of retail partners (Homebase, Home Depot, Sears, etc). For example, a customer might get a monthly reminder to change the furnace air filter, time it would take for the particular furnace, parts required, and links to air filters (one at a time or bulk) the consumer could purchase online.
3. The web site would also be a source for problem solving. If the consumer has a problem with an item, he or she would be able to get information about how to fix the problem if the problem is common and well known. Again, a job ticket would be made with part(s) needed, tools needed, time expected, "how to" instructions, and links for online shopping. If the problem is not common, it would be reported to the manufacturer. The web site would then email the manufacture's comments/suggestions to the consumer.
4. The web site would also act as a "Consumer Reports" with the knowledge of the inventory and reported problems from the consumer. This would allow the web site to offer the consumer information on brands, life expectancy, problems, maintenance, etc., for their next purchase. Online shopping would again be offered so the consumer could look for a particular item and see prices, warranties, etc.
5. Working with the manufacturers, the web site would also use the inventory to email consumers about recalls and warnings and information about what the consumer should do next.
6. Life expectancy reminders would also be sent by email or on the calendar. For example, an email such as "it is time to get a new roof or have current roof inspected" would help consumers stay on top of a products life cycle.
7. Partnering with manufacturers and retail stores would generate the web sites profits. Manufactures would get information about their products in order to make better products. Retailers would access consumers who need to buy maintenance, repair, tools, and new products.
8. Expansion possibilities – not only the house could be put into the inventory. It could be expanded to automobiles.

Hello Paul,

Attached are five Hewlett-Packard Invention Disclosures. I have enclosed a hard copy and an electronic copy of two Hewlett-Packard Patent Applications to use as templates, as well as sample copies of published e-commerce patents. The filing deadlines for these applications are as follows:

[REDACTED] -	Due November 12, 2000
[REDACTED] -	Due November 12, 2000
[REDACTED] -	Due February 15, 2001
H302.156.101 -	Due February 24, 2001
[REDACTED] -	Due February 24, 2001

If you need any further information in order to prepare these applications you may contact the inventors directly. Their contact information can be found in the invention disclosure forms. If you have any questions, please contact me.

Regards,

Steven E. Dicke

www.homenmaintain.com - Web site that would allow consumer to enter a household inventory of appliances, building material, or any other items that require maintenance, repair, and replacement.
Brett Webb & David Lanning LCS R&D Lab
May 3, 2000

Brief Description:

This web site would containing the following:

1. This web site would allow the consumer to enter an itemized list of household and house related information that will require maintenance, repair, and replacement. For example, all appliances (make, model), structure information (roof, siding), floor information (carpet (manufacture, grade), linoleum), paint (brand, type), lighting, etc.
2. With the above information, this database or inventory could be used to provide the consumer with a maintenance calendar. The consumer could print the calendar and use it to ensure regular maintenance. If the consumer would prefer, an email reminder could be sent as an alternate to the calendar, or both could be used.
 - a. The maintenance calendar/email would not only contain the helpful reminder; it would also contain a job ticket and an online shopping link. The job ticket would tell the user the part(s) needed, tools needed, time expected, and "how to" instructions and web links for further information. The online shopping link would link customers to URL's containing parts and prices from a variety of retail partners (Homebase, Home Depot, Sears, etc). For example, a customer might get a monthly reminder to change the furnace air filter, time it would take for the particular furnace, parts required, and links to air filters (one at a time or bulk) the consumer could purchase online.
3. The web site would also be a source for problem solving. If the consumer has a problem with an item, he or she would be able to get information about how to fix the problem if the problem is common and well known. Again, a job ticket would be made with part(s) needed, tools needed, time expected, "how to" instructions, and links for online shopping. If the problem is not common, it would be reported to the manufacturer. The web site would then email the manufacture's comments/suggestions to the consumer.
4. The web site would also act as a "Consumer Reports" with the knowledge of the inventory and reported problems from the consumer. This would allow the web site to offer the consumer information on brands, life expectancy, problems, maintenance, etc., for their next purchase. Online shopping would again be offered so the consumer could look for a particular item and see prices, warranties, etc.
5. Working with the manufacturers, the web site would also use the inventory to email consumers about recalls and warnings and information about what the consumer should do next.
6. Life expectancy reminders would also be sent by email or on the calendar. For example, an email such as "it is time to get a new roof or have current roof inspected" would help consumers stay on top of a products life cycle.
7. Partnering with manufacturers and retail stores would generate the web sites profits. Manufactures would get information about their products in order to make better products. Retailers would access consumers who need to buy maintenance, repair, tools, and new products.
8. Expansion possibilities – not only the house could be put into the inventory. It could be expanded to automobiles.
